I R

INDEX TO VOLUME TWO (1960), INDUSTRIAL RESEARCH

(Capital italics refer to titles of feature articles. Heavy numerals refer to issue numbers in volume two; light numerals indicate page numbers. For index to volume one (1959), see pages 100 and 101 in Vol. 1; No. 4, Industrial Research.)

A

THE ABUNDANT RARE EARTHS 4:31
acrolein 4:65
ADAPTIVE CONTROL 1: THE NEXT STEP IN CONTROL SYSTEMS EVOLUTION 3:12
ADAPTIVE CONTROL 2: A COMPARISON OF ADAPTIVE AND CONVENTIONAL CONTROL SYSTEMS 3:22
ADAPTIVE CONTROL 3: ALTERNATIVE TECHNIQUES 3:28
aircraft cockpits 3:65
air collisions 3:76
air safety 3:73
airspace 4:57
air-traffic control 4:55, 58
aminoplasts 6:59
ammonia 6:47
analog computers 6:18, 22
analog computer applications 3:80
analog-digital combinations 6:20
ANALOG VERSUS DIGITAL COMPUTERS 3:80
analysis instrumentation 3:56
ANALYSIS INSTRUMENTS — KEY TO PROCESS CONTROL 3:56
anemometers 4:17
antiradiation drugs 1:19
ARGONNE NATIONAL LABORATORY (a photographic portfolio) 2:37
Ashline, Dr. J. A., space Technology Laboratories Inc. *(author)* 3:12
Atwell, Albert A., Corporate Research Inc. *(author)* 1:37
AUTOMATED AIR-TRAFFIC CONTROL 4:54
automated learning 6:17
automatic control 3:14, 28; 6:24
automatic translation 5:66
automation 1:50; 4:54, 58; 3:23
THE AUTOMATION CONTROVERSY 1:50
AUTOMATION UPGRADES JOBS — NOT WORKERS 4:61
autopilot 3:13

B

Berland, Theodore, I•R contributing editor *(author)* 1:22; 4:16
betatrons 1:25
bio-engineering 5:60
boiling-water reactor 2:39
THE BORG-WARNER RESEARCH CENTER (a photographic portfolio) 4:47
Boyd, David M. Jr., Universal Oil Products Co. *(author)* 3:92
Brisley, Dr. Chester L., Chance Vought Aircraft Inc. *(author)* 1:58
Buckingham, Prof. Walter, Georgia Inst. of Technology *(author)* 4:61

C

Caldara, Maj. Gen. Joseph D., U. S. Air Force *(author)* 3:72
Campanella, S. Joseph, Melpar Inc. *(author)* 3:80
capacitor 4:16
catalyst control 3:94
cathode-ray tube 3:66
Cauley, Thomas K., U. S. Steel Corp. *(author)* 3:88
cavitation 2:31
cellulosic plastics 6:60
centralized research 1:78
centrifugal evaporation 1:81
Chestnut, Harold, control systems engineer, General Electric Co. *(author)* 3:28
chromatography 1:20; 3:60
circuits 4:20
circuit packaging 4:16
combustion 2:25
computers 2:41; 3:50; 4:17, 56, 62; 5:38
COMPUTERS 1: APPLICATIONS IN INDUSTRIAL RESEARCH 6:14
COMPUTERS 2: APPLICATIONS IN CHEMICAL PROCESSING 6:20
computer costs 3:81
computer program library 6:17
COMPUTER PROGRESS IN JAPAN 6:63
computer staff training 6:25
Connor, John A., Hughes Aircraft Co. *(author)* 5:28
consumer acceptance tests 6:51
contact analog 3:66, 69
THE CONTEST IN STEEL 6:52
control rods 3:86
control systems 3:24; 6:23
controlled-system sensing 3:32
CONTROLLING THE NUCLEAR REACTION 3:84
conversion of heat to electricity 4:36
cooking with sound 5:59
cyclotron 2:39

D

data handling 3:50; 6:16
density gaging 1:28
depression 2:15
detergents 6:48
diffraction gratings 5:63
digital computers 6:21; 3:80
dimensional measurements 5:63
displacement transducer 4:19
disposable fabrics 1:38
distillation 1:81
Driskell, Leslie R., principal instrument engineer, chemical plants division, Blaw-Knox Co. *(author)* 3:48
DE-SALTING SALT WATER 1:80
dye manufacture 6:47

E

eddy currents 1:20
electrodialysis 1:84
electrohydraulics 3:51; 4:29
electronic model 6:24
electronic multipliers 6:22
employe displacement 1:56
entrepreneurs 2:12
European Economic Community 6:51
EUROPE'S NEW INDUSTRY: THREAT OR PROMISE? 6:47
EXECUTIVE INEFFICIENCY 1:58
export boom 6:50
extremum adaptive control 3:14, 16, 36

F

fathometers 2:30
fatigue failure 5:53
feedback control systems 3:22, 80
fiberglass 1:34
fission 3:85
flat-plate collectors 2:51
flow measurement 2:32; 3:48
fluid catalytic cracking 3:94
fluoroscopy 1:26
flying belts 1:65
focusing collector 2:51
Fogel, Lawrence J., head, reliability analysis group, Convair Div., General Dynamics Corp. *(author)* 3:64
FORECAST FOR 1960: $13-BILLION FOR RESEARCH 1:12
FOREIGN COMPETITION (a special section) 6:46-68
foreign labor 6:52
Frings, Dr. & Mrs., prof. of zoology, and research associate, Pennsylvania State Univ. *(authors)* 5:55
fuel cell 1:19
fuel gage 1:66
fusion 1:17

G

gadolinium 4:34
gadolinium oxide 4:34
Gage, William P., president of Grace Research Div. *(author)* 1:74
galvanic corrosion 2:71
Garbarino, Dr. H. L., I•R technical director *(author)* 4:27
Gershinowitz, Dr. Harold, president, Shell Development Co. *(author)* 4:65
gibberellin 6:31
Gordon, Benjamin, Battelle Memorial Inst. *(author)* 6:20
graphic panel 3:93
grid-sorting 4:57
gross national product 2:15; 6:51
gyro motors 4:19

H

Harrer, Joseph M., associate director, reactor engineering division, Argonne National Laboratory *(author)* 3:84
HEAT WITHOUT FLAME 2:24
high-power applications for gases 2:31
high temperature 5:18
Holdiman, Thomas A., chief of air-traffic branch, System Development Corp. *(author)* 4:54
Horrel, Maurice W., general manager, Bendix Computer Division *(author)* 6:14
human computer 3:51
human error 5:38
HUMAN-FACTORS ENGINEERING 5:36
hydorgenation of coal 6:48
hydrogenation of coal 6:48
hypersonics 2:33

I

income per family 2:15
inefficiency 1:59
inertial navigation 4:18
THE INDUSTRIAL USES OF PENETRATING RAYS 1:22
industrial revolutions 2:10
THE INDUSTRIAL USES OF SOUND 5:45
infantry 1:64
infrared 3:57; 6:17
input signal 3:25, 27, 32
insect transmitters 5:56
INSTRUMENTATION IS CHANGING THE OIL INDUSTRY 3:92
INSTRUMENTING AIR SAFETY 3:72
interdisciplinary research 1:53
ion-exchange resins 4:32
ionization chamber 3:51
ionizing radiation 2:57; 3:86
isotopes 1:26; 4:19

J

Japanese scientists 6:62, 63
jet field 5:18
Johnson, Rogers W., business economist, General Electric Computer Dept. *(author)* 6:63

K

kinesthetic sensing 3:67
Kinzel, Dr. A. B., vice-president, research, Union Carbide Corp. *(author)* 5:15
kybernetics 5:66

L

THE LABORATORY USES OF SOUND 5:51
Larsen, Dr. Finn J., vice-president of research, Minneapolis-Honeywell Regulator Co. *(author)* 3:22
landing gear 1:65
lanthanum 4:32
La Que, Dr. F. L., vice-president of research, The International Nickel Co. *(author)* 2:69
lead time 2:20
learning model 3:15, 20
Lemmon, A. W., Battelle Memorial Inst., assistant chief engineer *(author)* 6:20
levicar 1:17
LIFE SOUNDS AND COMMUNICATIONS 5:55
linear accelerator 2:39
linear control 3:28
line and staff positions 1:61
logic unit 3:36; 4:24
Luft analyzer 3:58

M

machine-data processing 4:54
magnet brake 4:19
magnetometers 4:17
maintainability engineering 5:29
management 2:11; 3:97; 4:61
market research 6:51
Mason, Dr. Warren P., head, mechanics research group, Bell Telephone Laboratories Inc. *(author)* 2:30
materials engineering 5:15, 17
materials handling 6:54
mathematical model 6:17
micro-diode 4:18
microelectronics 4:22
miniaturization 3:82, 4:18, 22; 5:8
microwave components 2:34
MINIATURIZATION: GOAL AND COAL AND BYPRODUCT 4:16
THE MODE OF -MATERIALS RESEARCH 5:15
model testing 6:17
Mohorovicik discontinuity 2:67
molecular circuits 5:54
molecular electronics 4:22
molecular spectroscopy 5:64
Momsen, Adm. Charles A., Johnson, Momsen & Associates *(author)* 2:63
monorails 6:59
moon garden 1:15
motion study 5:37
multiple-effect distillation 1:83
multiple-regression 6:16

N

neutron-flux 3:85, 86
NEW AIRCRAFT DEVICES 1:64
new-product development 4:27
nondestructive testing 1:24; 5:45
non-linear control 3:31
non-woven fabrics 1:40
nuclear magnetism logging tool 4:48
nuclear propulsion 2:59, 61
nuclear reactor instruments 3:86
numerical weather prediction 6:18, 19

O

OCEANS OF BUSINESS OPPORTUNITIES 2:63
office automation 1:55
Olt, T. F., vice-president, research and technology, Armco Steel Corp. *(author)* 6:52
Oostermeyer, Jan, president, Assn. for Applied Solar Research *(author)* 2:46
AN OPTICAL METHOD FOR DIMENSIONAL MEASUREMENT 5:62
ORGANIZING RESEARCH: GRACE & CO.'S HEADSTART 1:74
OUR NUCLEAR SEAPLANE 2:59
osmosis 1:84

P

packaged electronic circuits 4:21
patents 2:19; 3:97
petroleum refining 1:29; 3:92
Pfund analyzer 3:58
phenolics 6:59
phonon frequencies 2:34
photoelectricity 1:19; 1:23
Pickar, Amos, physicist, Stanford Research Inst. *(author)* 5:51
pilot plant 4:67; 6:23
PITFALLS OF NEW-PRODUCT DEVELOPMENT 4:27
PLANNING RESEARCH 4:65
plasma 1:18
plastics 5:20
plastics consumption 6:59
pneumatic instruments 3:48
polyester resin 6:61
polyethylene 5:20; 6:59
polysiocyanates 6:60
polymers 5:46
polyolefins 6:61
polystyrene 6:59
polyurethanes 6:60
polyvinyl chloride 6:59, 60
population 2:15
Prince, Luther T., engineering supervisor, Minneapolis-Honeywell Regulator Co. *(author)* 3:22
process controls 3:48
product goals 1:74
profit 1:79
programing 3:14; 6:16
purchasing power 6:47

Q

A QUESTIONNAIRE FOR THE TECHNICAL MAN IN INDUSTRY 2:19

R

radar 4:57
radiation 2:26, 53
radiation pyrometry 4:36
radio controls 1:66
radiography 1:25, 27
rare earths 4:31; 5:8, 18
raw-material costs 6:52
A REALISTIC LOOK AT NUCLEAR RADIATION ENERGY 2:53
reflectoscope 2:30
Reiffel, Dr. Leonard, director of physics, Armour Research Fndn. *(author)* 2:53
reliability 5:23
RELIABILITY: AN ENGINEERING PROBLEM 5:22
RELIABILITY: A MANAGEMENT PROBLEM 5:28
research budgets 1:13
retrofit 3:79
REVAMPING THE CLOCK-SHOP COCKPIT 3:64
reversing cold mill 3:19
rocketry 5:18
THE ROLLING MILL AS AN INSTRUMENT 3:88
rotary switch 4:19
Russian growth rate 2:13
Russian production goals 6:56
Russian steel capacity 6:56
Ruzic, Neil P., I•R editor & publisher *(author)* 2:10

S

salaries 2:19; 3:95
Salmon, Dr. Vincent, manager, sonics section, Stanford Research Inst. *(author)* 5:45
satellites 4:17
Sayce, Dr. L. A., superintendent of light, National Physical Laboratory, London *(author)* 5:62
Schwieger, A. M., manager of European technical observation, Armour Research Fndn. *(author)* 6:47
science of materials 5:17
seapower 2:64
seawater 1:19; 2:64
selenium 4:34
semiconductors 4:18, 22, 34
servo-hydraulic motors 4:19
shear waves 2:34
shortages of raw materials 6:47
simulation 6:22, 23
spectroscopy 2:41; 5:64
SPEEDUP IN OFFICE COPYING 6:69
spin waves 2:34
solar energy 1:84; 2:47; 3:102; 4:19
solvent extraction 1:85
sonar 2:32; 5:45, 47, 48, 52
sound 5:3, 59
standardization 5:33
steel capacity 6:55
steelmaking 6:52, 54
Stern, James, international representative, United Auto Workers *(author)* 1:50
strain gages 5:58
strip mills 6:55
THE STUNTED GROWTH OF GIBBERELLIN 6:31
synthetic resins 6:62
systems engineering 2:21; 5:27
SUNPOWER 2:46
CORROSION, AN ENIGMA 2:69
superalloys 1:21

T

Tall, Max M., manager of reliability and value engineering, Radio Corp. of America *(author)* 5:22
tape recorders 4:19
THE TECHNICAL ENTREPRENEUR 2:10
technical innovation 2:13
technical management 2:11
technical motivation 4:8
tellurium 4:34
Temple, Robert W., A. D. Little Inc. *(author)* 6:57
test signals 3:15, 18
textiles 5:49; 6:16
thermocatalytic heat 2:24
thermocouples 3:86
thermo-drive actuators 3:51
thermoelectric devices 3:28, 52; 4:22
THROW AWAY YOUR CLOTHES 1:37
time study 1:60
tin 5:8
torsional crystal 2:33
transistors 4:18, 20

U

ULTRA- AND HYPERSONICS 2:30
ultrasound 5:59
underwater sounds 6:16

V

Vickery, Dr. R. C., senior research scientist, Nuclear Corp. of America *(author)* 4:31

W

Weiss, Gerhard, director of research and engineering, American Thermocatalytic Corp. *(author)* 2:24
Weiss, Marvin D., section head, special instrumentation division, Union Carbide Olefins Co. *(author)* 3:56
WHAT KIND OF PLANE IS THE U-2? 4:70
WHAT WILL PROCESS CONTROLS LOOK LIKE TOMORROW? 3:48
Williams, H. L., supervisor of human-factors engineering, Melpar Inc. *(author)* 5:36
Wittwer, S. H., dept. of horticulture, Michigan State Univ. *(author)* 6:31
work simplification 1:62
WORLD RISE OF PLASTICS 6:57
Wyhe, K. M. Jr., I•R contributing editor *(author)* 1:80

Y

yttrium 4:34
